James Ogbodu — AWS Cloud Engineer

Lagos, Nigeria

Jamesogbodu18@gmail.com · linkedin.com/in/james-ogbodu · github.com/James-Tega ·

Portfolio: d2mef3mxp6f2cq.cloudfront.net

PROFESSIONAL SUMMARY

Computer Technology graduate and AWS Certified Cloud Engineer with hands-on experience deploying scalable, cost-efficient cloud infrastructure on AWS. Skilled in serverless architecture, cloud security, and automation. Passionate about solving real-world problems through cloud engineering, with a track record of building and deploying live AWS projects including a fully serverless cloud portfolio with CI/CD pipeline.

EXPERIENCE

Freelance Cloud Supporter — 2024 – Present

Self-Employed · Lagos, Nigeria

- Deploy and configure AWS infrastructure including EC2, S3, Lambda, API Gateway, DynamoDB, and CloudFront for clients
- Troubleshoot and resolve cloud environment issues, reducing downtime and improving system reliability
- Advise clients on AWS cost optimisation strategies, eliminating unnecessary services and reducing monthly spend
- Implement IAM roles and security policies following least-privilege access principles
- Set up static website hosting on S3 with CloudFront CDN delivery and HTTPS

IT Department Intern — 7 Months

Independent National Electoral Commission (INEC) · Lagos, Nigeria

- Supported IT department with systems administration, hardware maintenance, and technical support
- Gained hands-on exposure to enterprise IT infrastructure and internal network management
- Assisted with operational troubleshooting in a high-pressure government institution environment

KEY PROJECTS

Cloud Portfolio Website NEW — d2mef3mxp6f2cq.cloudfront.net

AWS S3 · CloudFront · Lambda (Python) · DynamoDB · API Gateway · SNS · GitHub Actions · CI/CD

- Designed and deployed a fully serverless personal cloud portfolio on AWS — static frontend on S3 with CloudFront CDN and HTTPS
- Python Lambda backend powers a live visitor counter via DynamoDB and REST API through API Gateway
- Contact form sends email notifications via SNS; CI/CD pipeline with GitHub Actions auto-deploys on every git push

Serverless Feedback App — d3jd94tvt098le.cloudfront.net

AWS Lambda · API Gateway · DynamoDB · S3 · CloudFront · Python

- Fully serverless feedback application with a clean frontend hosted on S3/CloudFront and a Python Lambda backend storing submissions in DynamoDB via API Gateway
- Debugged CORS issues, Lambda runtime mismatches, and CloudFront cache invalidation

EC2 + RDS User Registration App — github.com/James-Tega

AWS EC2 · Amazon RDS · PHP · MySQL · Apache

- PHP/MySQL application deployed on Ubuntu EC2 with Apache, connected to an Amazon RDS MySQL instance
- Demonstrates cloud-hosted application architecture with managed database integration and VPC security group configuration

TECHNICAL SKILLS

AWS Services	EC2, S3, Lambda, API Gateway, DynamoDB, RDS, CloudFront, IAM, VPC, CloudWatch, SNS, AWS CLI
Languages	Python, HTML, CSS, Bash
Tools & Platforms	Git, GitHub, Linux, GitHub Actions (CI/CD), Terraform (learning)
Databases	Amazon DynamoDB (NoSQL), Amazon RDS / MySQL
Concepts	Serverless Architecture, Cloud Security, Infrastructure as Code, Static Site Hosting, CI/CD

EDUCATION

B.Sc. Computer Technology — GPA: 3.69 / 5.0 2021 – 2025

Babcock University · Nigeria

Senior Secondary School Certificate 2015 – 2021

Beacon Light High School

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) Verified

Amazon Web Services · Key areas: Cloud Concepts, AWS Infrastructure, Security & Compliance

AWS Solutions Architect Associate (SAA-C03) In progress

Adrian Cantrill's course · Expected 2025

Certificate of Completion

New Horizons
